During the first forum we shared our impressions on the current situation and challenges of Anthroposophy and the Anthroposophical Society in the different countries and world regions. 15 burning issues were identified, and the decision was taken to start a common work on these issues and challenges. In the third forum, on the 1st of June, we opened the space for free initiatives (working groups) offered by members..

The fourth forum – Working for and out of Anthroposophy facing ahrimanic assaults – will focus on the continuation of our work within the International Members’ Forum. We again opened the space for working groups offered by members. Our aim is to understand better the challenges of our time and engage towards a positive development. It is open for all members, and you are free to select your preferred topic in the working-groups. Within the plenum we will share first results and also focus on a common topic

We chose, independently of the working-groups, a common, overarching and framing theme which we find to be crucial: We see how chaos, polarities and war are spreading around the world. Ahriman is preparing his incarnation:

- Do we understand his way of working in the world, in us and his intentions?

- What are the challenges that Anthroposophists face in their work in the world with Anthroposophy, and what are necessary steps to face these concrete challenges and bring healing impulses into culture?
- How can we become Micael's coworkers in dealing with Ahriman's influence?

You will be able to meet members from different countries and realities, joining towards the effort to work out of and for the Anthroposophy worldwide! So far the languages for the plenary are English and Spanish. Additional languages are in preparation. The forum is offered for free. You can register on our webpage
